

Eco-EvolutionTM

Crayola is making every effort to make the products you love more environmentally friendly.

Solar panels at our Easton, PA plant provide enough energy to produce one billion crayons each year in the U.S.A.

Using recycled plastic in our products keeps hundreds of tons of plastic out of landfills each year.

Crayola colored pencils are made with planted trees, preserving the natural forests.

Visit Crayola.com to learn more about our efforts to be environmentally responsible.
